UKINOX

Gone solar, pollution - free and high - tech, the UKINOX plant in Türkiye uses clean energy which reduces greenhouse gas emissions.

UKINOX Kitchen sinks factory

Ukinox Kitchen systems was established in Istanbul, Turkey in 1992.

Since the founding of our first factory, we have been manufacturing high-end stainless steel sinks with the most advanced level of expertise in the industry.

As our reputation grew simultaneously with quality and affordability, so did our manufacturing facilities. Besides our manufacturing site in Turkey, we have a overall capacity of producing 3 million pieces of sinks annually with 3 factories worldwide. Including distribution centres for our products in 6 countries.

Our factories and products are certified by international quality standards organisations, such as EN ISO 9001, IAPMO UPC, SEDEX SMETA etc.

Kitchen sinks surfaces

Stainless Steel

UKINOX offers sinks in a selection of stainless steel finishes, so whether you prefer the more reflective qualities of the polished finish or the more subtle look of the silk or brushed finishes, which give a more matt sheen, there is a stainless steel solution for you.

colorX

PVD

Enviromentally friendly technology; The surface created from a ceramic like inorganic compound that protects against scratches, prevents the bacterial growth and residue, leaves us with a complete confidence in terms of hygiene.

Granite

Granite contains around 80% granite particles which results in enormous strength and resistance.

Glass

UKINOX uses a combination of toughened safety glass and stainless steel bowls.

How to clean your Ukinox kitchen sinks

Granite

Granite kitchen sinks are made from granite and composite material. With regular use, food particles, soap scum, limescale and buildup can occur in the sink. Granite composite sinks require the use of mild cleaning products to prevent damage to their finish.

Wipe the sink thoroughly with warm water and a few drops of dish soap on a cloth to remove light buildup. Rinse it thoroughly and dry with a cloth.

Remove tough stains with cream cleanser and a nylon brush or scrubbing pad. Scrub the sink in a circular motion to remove the stains. Rinse well and dry the sink with a cloth.

Remove limescale buildup by soaking 3 parts water and 1 part vinegar in the sink for a few minutes. Drain the sink and scrub the deposits with a nylon brush or scrubbing pad. Rinse the sink thoroughly and dry it with a cloth.

Glass

Clean glass sinks regularly to avoid mineral or bacteria buildup. Don't forget to clean the outside of the sink as well! Spots or fingerprints can be cleaned by using a standard glass cleaner. If a glass cleaner is not available, a mixture of vinegar and water will also work. Use a non-abrasive cloth to wipe the sink clean and rinse well. Abrasive cleaners or scouring pads may scratch the glass. Take care when cleaning the exterior of a glass sink as it might have a foil or printed application that could be damaged by scrubbing.

Extremely hot water may cause the sink to crack or shatter. As a general rule, if the water is too hot to the touched, then it is too hot to a glass sink.

Wipe the sink dry after each use to avoid spots, especially if you have hard water. Water spots caused by hard water can create mineral stains that cannot be removed.

Do not store heavy or sharp objects above glass sinks. If they fall, they can scratch or shatter the sink. A chipped or cracked glass sink cannot be repaired.

Stainless steel

A kitchen sink is a heavy-duty utensil and may show traces of wear over time. Regular cleaning to remove dirt is the best form of maintenance for your sink and will extend its life and beauty. Observe this guide to the use and care of our stainless steel or granite sinks for best results.

Keep the sink dry. Regularly rinse and towel dry your sink with a soft, dry cloth when not in use to keep it dry. This will prevent surface deposits and water spots caused by lime in the water.

Use non-abrasive cleansers. Do not use strong abrasive cleansers or cleansers that contain chlorine (usually sodium hypochlorite) or hydrochloric acid, steel wool or metal scrub pads-these will scratch and dull the surface of the sink.

Rinse away cleansers after use and wipe the sink dry again to prevent water spots from forming.

Do not pour paint into your sink. The chemicals in acrylic paint will react with granite sinks if allowed to sit over 24 hours and will produce permanent marks. For latex-based paints, try removing any residue immediately using a paint remover manufactured by the same brand. Consult the paint remover recommendations before using on any sink.

Use vinegar and water in a mild solution to remove any mineral deposits that may have built up.

colorX

Use a mild soap and a soft cloth with water. Avoid all products that includes hydrochloric hydrofluoric and/or phosphoric acids or caustic agents. Avoid bleach. Avoid scouring pads.

Follow the grain of the steel if using a stainless steel polish. When using a stainless steel polish, ensure that you read directions carefully. You should use a damp cloth and follow the grain of the steel when polishing. Rinse with water and buff with a soft, static-proof cloth for best results. For extra care, test on a small area first.

Do not drop sharp objects into your sink and do not use your sink surface as a cutting board as this may scratch or damage the sink. Materials that are harder than stainless steel can scratch, including stone, diamond, glass, ceramic or abrasives.

Use a sink bottom grid to protect your sink. Ukinox custom-sized stainless steel grids are available that fit inside the bottom of the sink bowls and protect the sink from scratches that could be caused by sharp utensils or other kitchen tools.

Rust spots and stains can be removed with metal cleaners. Stainless steel does not rust, however rust stains may occur as a result of other materials coming in contact with the sink allowing iron particles to bond to the sink surface. Iron particles introduced by metal cookware, steel wool pads, etc. that react with water can deposit rust spots.

Do not use rubber-coated mats as discoloration of the sink may occur after prolonged use. Similarly, any wet sponges or cleaning materials left on the sink for long periods could stain the sink surface.

The present invention is directed to a system comprising a rimless stainless steel sink structured and disposed to be integrated to granite, quartz, porcelain, marble or any solid surface.

The beauty and sleek elegance of seamless look offers aesthetics and hygiene to any kitchen design.

**It's all about The Rimless Edge.
The edge of TopZero Sink is
flush to the top of your countertop
instead of underneath.**

TopZero seamlessly eliminates the trouble gap between the countertop and the sink, creating one less place to continuously maintain and keep clean in the kitchen.
